bourbons

bourbon is an american whiskey made mostly from corn (at least 51%), aged in new charred oak barrels. it must be distilled and bottled in the U.S., and by law, nothing can be added except water. the result? a smooth, sweet, full-bodied spirit with rich notes of vanilla, caramel, and oak

rye whiskey is its spicier cousin, made with at least 51% rye grain, which gives it its drier flavour with peppery notes and a crisp finish. bolder than bourbon — and perfect for classic cocktails or sipping with bite

mash is the grain recipe used to make whiskey — it shapes the flavour, from sweet and smooth to bold and spicy
